Version: Nov. 18, 2019

Adhesion promoter T-70 (TDS)

1. Description

T-70 is a reactive amino group containing polymer. It can improve the mechanical properties and improve the film adhesion between coating and substrate when used with appropriate amount

2. Technical index

Appearance	White powder
Activity content(%)	>70
Solid content(%)	>99

3. Formula reference

0.5~0.8% of total formula for extrusion.

4. Package and storage:

Packaging with PE lined Kraft paper bags, Net weight is 25kg per bag. Store in cool and dry place to avoid moisture. According to our experience, the period of validity of this product is at least 2 years when ambient temperature is below 30 °C.
